

Sealing Recommendation For Labelled Tubes

When sealing tubes that have had labels by Berry Astrapak we recommend the following sealing guidelines:

- **The space between the cap and the base of the label should be a minimum of 5mm**
- **The space between the top of the label and the sealed area should be a minimum of 5mm**
- **The sealed area should have a minimum height of 7mm and a maximum of 10mm**
- **There is a 2mm above the sealed area allowed for trimming**

Not adhering to these recommendations can have adverse affect on the adhesion of the tube.
